Desono BPAK
Installation Guide

C-IC6 or C-IC6LP with Tesira unit
secured with backpack clips and
conduit cover
(shown with an AMP-450BP)

## PRODUCT DESCRIPTION

The Desono BPAK Backpack Kit allows a Tesira AMP-450BP, AMP-450P, TCM-X or TCM-XA to be attached to the top of a Desono C-IC6 or C-IC6LP back can.

Kit Contents

Cover

Clips and M3 screws
(2 each)
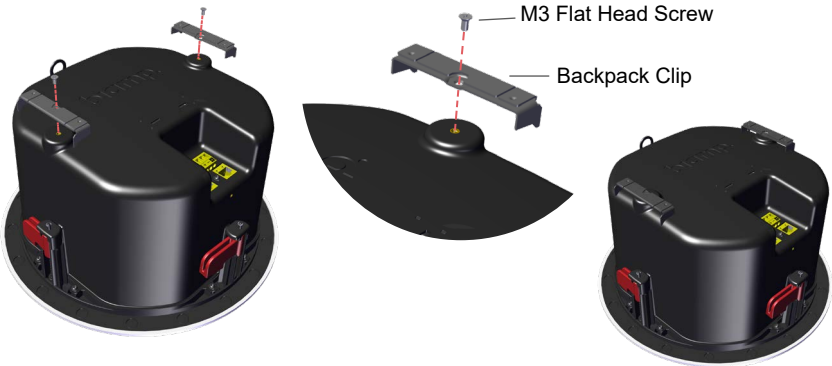

Tesira CAT5 Jumper
cable *(not shown)*

C-IC6

C-IC6LP

Tesira Unit
(AMP-450BP shown)

INSTALLATION

1. Attach clips. Installation method is the same for C-IC6LP.

M3 Flat Head Screw

Backpack Clip

2. Fully slide unit into clips

Use this hole for seismic wire attachment or to further prevent movement on the back can

3. A cover is provided for conduit usage or strain relief. Punch out the cut-out, attach conduit fitting or cable clamp and feed wiring through the opening. Connect wiring per the device instructions. Insert cover tabs into the slots on the Tesira unit and secure the cover with the thumbscrew.
